WEB DEVELOPER

My name is Hananditya Kenanta Setyaputra. I am a Web Developer. I work in Logique Digital Indonesia in Jakarta

As a web developer, my responsibility is to create, build and maintain websites. Not only designing the appearance of the website, but also ensuring that all functions run without problems. I spend my time coding and designing websites, I also do testing and debugging to make sure the web can run without problems. Even though this job is difficult and tiring, I feel happy and satisfied when the website I created can run smoothly and in accordance with client requests.
